

ST PAUL'S BARNES  
SWIMMING CLUB

## YOUR CLUB NEEDS YOU!

As the membership has grown and we have more swimmers competing in more meets than ever before, life is becoming officially 'impossible' for the Coaches! In addition to all the hours spent by the pool week in week out throughout the year, the Coaches have an ever increasing admin work load. Some would say it is not their strength! All would agree it is not where they should be focusing their energies! SPBSC already has a number of parents providing support in many ways to the club so if you would like to join the merry band of helpers then please see the 'situations vacant' below and contact Tom Taylor: [tbt@stpaulsschool.org.uk](mailto:tbt@stpaulsschool.org.uk) without delay! We can guarantee that your child will be an Olympic Swimmer if you help out – actually that bit's not true but it will be rewarding and you will have lots of laughs along the way!

### ENTRY FEE TREASURER

At the moment the Coaches are receiving cheques left, right and centre and this process is screaming out for a 'System' and a 'System Manager'! The prime role would be to manage the meet entries, identify any cheques that need raising, chase the cheques and record that all fees are paid by closing out each meet account.

### CLUB SHOP

In the spirit of flexible working practices this position is a job share! Nicola Brandon has volunteered to help out here but is looking for another person to cover the nights she is not there. We would aim then to have the Shop open 2-4 nights a week. If you always fancied working in retail and fashion this is undoubtedly the position for you!

### ADMIN ASSISTANT

Inputting results into the Hytek system after each gala. Something that could be done at the side of the pool during training sessions? At home on a Sunday evening with glass of wine in hand? During second act of eldest child's production of King Lear? Full training given!

We really hope you will find some time to get involved and support the club as it supports your child to achieve their fullest potential.
